

ASA ADVOCACY

Provides Leadership
to Ensure Sound
Product & Building
Codes

The PHCP & PVF marketplace is regulated by an array of model codes and product standards that have a **direct impact on our members' access to the market.** ASA participates in the development of model codes covering buildings, plumbing, fire, energy and water efficiency, and mechanical systems.

ASA represents our members by participating in wide range of product standards.

ASA Keeps Its Eye on Vital Issues that Impact Your Business So You Can **Focus on Your Business**

Each year, more than 150,000 federal and state pieces of legislation and more than 70,000 federal and state regulatory actions are introduced to ASA and kept track of through a sophisticated monitoring system. Of all those bills, ASA closely monitors and takes action on hundreds that have a realistic chance of becoming law and have an impact on our industry.

The ASA Advocacy team not only can track each bill being introduced but specifically sorts through those bills that are directly impacting our plumbing and PVF members and their customers.

ASA's **POLITICAL ACTION COMMITTEE** Supports Pro Business PHCP & PVF Candidates to be Your Advocate When Issues are Being Debated by Elected Officials

In today's political climate, the term political action committee (PAC) carries with it a very negative opinion by the average American. After all, nobody wants to feel that their vote is wiped away because of the millions of special interest dollars thrown behind candidates for federal office.

But not all PAC's are negative. Never has there been a more important time for our industry to have a well-funded PAC to support good candidates for political office. The ASA Political Action Committee champions candidates for federal office that are supportive of the critical issues facing the PHCP & PVF industry.

Every two years, the ASA PAC Committee reviews hundreds of candidates seeking our support and then selects only those candidates most deserving of a campaign contribution from our PAC.
